

BI Data Engineer

Bell Switzerland - Focus Bell International Bell stands for quality, reliability and innovation - not only in food, but also in the handling of data. In this role, you will be based at Bell Switzerland in Basel, where you will actively shape the data and analytics landscape for Bell International and play a key role in setting up, operating and further developing the Group-wide data and analytics platform. Your work will have a direct impact on international departments: You create transparency, scalable data structures and a resilient basis for decision-making for a global business

Bell Schweiz AG

Apply online

You can find all the details online as well as the opportunity to apply directly.

Your tasks

- Development, operation and continuous further development of the data analysis platform for Bell International based on the Microsoft Data Platform
- Design and implementation of a consolidated enterprise data warehouse architecture (including Datalake, DWH, Semantic Layer)
- Modelling of data with dimensional modelling (star/snowflake schemas)
- Analysing complex technical issues and translating them into scalable data models
- Development and operation of SQL Server Analysis Services (Tabular / Multidimensional) and Power BI datasets
- Creation and further development of Power BI reports, dashboards and Excel integrations (e.g. Anaplan XL add-ins)
- Development of self-service BI solutions for international departments
- Ensuring data quality, performance, security and governance
- Collaboration with specialist departments to optimise data usage and decision-making
- Training and enablement of users (basic users to BI experts)
- Collaboration in agile working methods (e.g. Kanban, Scrum)

What you bring with you

- Sound experience in the business intelligence and data engineering environment, ideally in an international industrial organisation
- Several years of experience with the Microsoft BI/Data Platform, in particular with SQL Server, SSIS, SAAS, Power BI and Azure Data Platform such as Azure Synapse Analytics and Datalake
- Very good knowledge of SQL and DAX
- Experience in building and operating semantic models and enterprise data architectures
- Understanding of end-to-end data flows - from the source to the business report
- Structured, solution-orientated and independent way of working
- Enjoy working with specialist departments and interdisciplinary teams
- Strong communication skills and ability to explain complex issues in an understandable way
- Willingness to travel to some of Bell International's international locations
- Very good knowledge of German and English, French an advantage
- Curiosity and interest in new technologies, data architectures and best practices

What we offer

Work-life balance
