Apply online

You can find all the details online as well as the opportunity to apply directly.

Your tasks

- You make sure that the spark only jumps where it should: As a mechatronics technician (m/f/d), you will help us to ensure that our production systems run safely around the clock.
- This means you will install new components or make changes to devices, machines and operating equipment.
- You will also keep an eye on maintenance intervals and carry out preventive maintenance work.
- If something should ever break down, you will be on hand to repair the relevant part and thus make a very important contribution to system availability.

What you bring with you

- Completed technical training as a mechatronics engineer and/or electrician
- Ideally, you have already successfully applied your knowledge in practice
- A plus, not a must: knowledge of pneumatics and hydraulics
- You are a reliable, responsible person who works very precisely and independently and is willing to help out in 2-shift operation - even at weekends

What we offer

Catering

Catering is very important to us: you can enjoy freshly prepared food as well as high-quality products at greatly reduced prices in our canteen and at 'Hubers Genusswelt'.

Mobility

For those who prefer to travel by car, we offer ample parking spaces and/or our own multi-storey car park.
