Apply online

You can find all the details online as well as the opportunity to apply directly.

Your tasks

- You'll ensure that sparks only fly where they're meant to: as a mechatronics engineer (m/f/d), you'll help us keep our production facilities running safely round the clock.
- This means you'll install new components or make modifications to equipment, machinery and plant facilities.
- You'll also keep an eye on maintenance schedules and carry out preventative maintenance.
- Should anything ever break down, you'll be on hand to repair the relevant part, thereby making a vital contribution to the availability of our systems.

What you bring with you

- Completed technical training as a mechatronics technician and/or electrician
- Ideally, you have already successfully applied your knowledge in a practical setting
- An advantage, but not essential: knowledge of pneumatics and hydraulics
- You are a reliable, responsible person who works with great precision and independently, and is willing to pitch in during two-shift operations – including at weekends

What we offer

Catering

Catering is very important to us: you can enjoy freshly prepared food as well as high-quality products at greatly reduced prices in our canteen and at 'Hubers Genusswelt'.

Mobility

For those who prefer to travel by car, we offer ample parking spaces and/or our own multi-storey car park.
