

(Senior) Product & Solution Architect – Jedox Platform

Providing figures is good. Shaping the future is better. Do you think in terms of intelligent data streams and smart architectures rather than rigid spreadsheets? As part of the BI, Analytics & Digitalisation team, you'll become the architect of our decision-making framework. Here, you won't just be building models – you'll be laying the foundations on which management and business units make far-reaching decisions every day for FP&A, the supply chain and Sustainability (ESG). Make the data speak and take our Jedox platform to the next level!

Bell Schweiz AG
Elsässerstrasse 174
4056 Basel

Contract type	Permanent
Workload	100%
Start of employment	as of now
Language	German
Working time model	Hybrid working time after coordination

Apply online

You can find all the details online as well as the opportunity to apply directly.

Your tasks

- Architecture & Modelling: You will design, implement and refine high-performance Jedox models (cubes, dimensions, business rules, subsets) and make complex planning logic intuitive to use.
- Smart Data Integration: Using the Jedox Integrator and lean Groovy scripts, you'll develop reliable ETL pipelines and ensure that source systems integrate seamlessly.
- Platform Management: You'll keep the system fast, stable and secure – from access rights management and deployments right through to fine-tuning query performance and version upgrades.
- Business partnering on an equal footing: You translate operational controlling questions into smart forecast and rolling forecast solutions and build interactive dashboards that deliver genuine 'aha' moments.
- Knowledge transfer & enablement: As a sought-after sparring partner, you empower key users to use the platform, lead practical training sessions and highlight best practices within the team.

We can only consider applicants who are authorised to work in Switzerland (EU/EFTA). We only consider direct applications.

What you bring with you

- Your foundation: A degree in Business Informatics, Business Administration with a strong focus on IT, or a comparable qualification – coupled with a passion for working at the interface between technology and business.
- Jedox expertise: At least 1–2 years' demonstrable practical experience in Jedox modelling, rule logic and ETL pipeline creation.
- A flair for code and data: You have a keen understanding of relational and multidimensional data, are completely at home using Excel/Power Query, and have a basic knowledge of Groovy, Java or similar scripting languages.
- Understanding of Controlling: Terms such as rolling forecast, contribution margin analysis or profit and loss account are not just technical jargon to you, but exciting real-world applications.
- A 'can-do' attitude: Curious, solution-oriented and communicative – you enjoy taking the initiative to tackle tasks and actively streamline processes.
- Languages: Business-fluent German; a good command of English and/or French is a real plus.

What we offer

Work-life balance
A healthy work-life balance is important to us. You benefit from at least 25 vacation days as well as transparent electronic time tracking. This allows you to flexibly compensate any overtime with additional time off.

Catering
Culinary delights are very important to us: freshly prepared food in our staff restaurant, a lunch menu including soup and salad, water & tea and free fruit as well as high-quality products at greatly reduced prices await you in our outlet.

Mobility
Benefit from our contribution to environmentally friendly mobility, convenient public transport connections and a free SBB GA travelcard!

Professional development opportunities
Expand your knowledge with extensive training programmes, high-quality courses at the Coop Training Centre and a wide range of personal development opportunities.
