

SAP MDG/MM Master Data Management Specialist

Do you want to do more than just manage base data – do you want to actively shape its future? In this key role, you'll take responsibility for the further development of our base data management within the SAP environment. You'll work at the interface between business and IT, leading or supporting projects and ensuring that our master data processes are efficient, standardised and future-proof. With your in-depth SAP expertise, your understanding of business processes and your experience in master data management, you'll make a significant contribution to data quality and the further development of our system landscape.

Your tasks

- Responsibility for data governance and ensuring the high quality of our product and material master data
- Further development and optimisation of master data processes within the SAP environment
- Providing technical support and driving the ongoing development of SAP MDG
- Analysing, designing and implementing new requirements in collaboration with business departments and IT
- Leading or co-leading base data, SAP and transformation projects
- Defining, documenting and harmonising processes, guidelines and standards in master data management
- Management and updating of product master data in SAP, including administration of GTINs and RCNs, as well as maintenance of block lists and article blocking
- Close collaboration with internal business departments, external partners and SAP specialists
- Providing support and advice to business stakeholders on all matters relating to base data and SAP processes
- Supporting the SDM Business team in their day-to-day operations within the scope of the assigned responsibilities

What you bring with you

- A degree or further qualification in Business Administration, Business Informatics, Supply Chain Management or a comparable field
- Several years' professional experience in master data management
- Substantial practical experience with SAP MDG
- Very good knowledge of SAP MM, as well as a good understanding of related processes and modules (PP, SD)
- Experience in leading or co-leading SAP, base data or transformation projects
- A strong understanding of business processes and SAP system landscapes
- Ability to analyse requirements from business departments and implement them in collaboration with IT
- Experience with data migrations, data quality management and process optimisation would be an advantage
- An independent, structured and solution-oriented approach to work
- Fluency in spoken and written German; knowledge of English and French would be an advantage

What we offer

Work-life balance
A healthy work-life balance is important to us. You benefit from at least 25 vacation days as well as transparent electronic time tracking. This allows you to flexibly compensate any overtime with additional time off.

Catering
Culinary delights are very important to us: freshly prepared food in our staff restaurant, a lunch menu including soup and salad, water & tea and free fruit as well as high-quality products at greatly reduced prices await you in our outlet.

Mobility
Benefit from our contribution to environmentally friendly mobility, convenient public transport connections and a free SBB GA travelcard!

Professional development opportunities
Expand your knowledge with extensive training programmes, high-quality courses at the Coop Training Centre and a wide range of personal development opportunities.
