Apply online

You can find all the details online as well as the opportunity to apply directly.

Your tasks

- IT plays a particularly important role in industrial food production, whether in ensuring the reliability of hardware, developing applications and tools, or providing the technical framework for traceability. IT specialists ensure that all staff have access to a modern, fully functional IT infrastructure. They also implement additional solutions from various specialist areas.
- In application development, you will learn how to implement software solutions for new or modified products and processes. In addition to carrying out the testing phase, your responsibilities will include user training and documenting all work steps for support purposes or for the potential further development of the application. Systems engineering involves setting up, integrating and maintaining various IT and network systems. This also includes installing PC workstations, printers, servers and other peripherals, as well as configuring the hardware. Configuring services, shares and permissions, troubleshooting faults, creating data backups and securing all systems against unauthorised access are further tasks you will learn.
- IT specialists are among the most sought-after professionals in almost every sector. This means you'll have excellent prospects on the job market once you've completed your apprenticeship.

What you bring with you

- Completed primary school (middle or upper years)
- Analytical thinking and a very good ability to think abstractly
- Good maths and language skills (particularly English)

What we offer

Work-life balance

We offer 35 vacation days so that you have enough time to recover and are then fit for work and school again.

Catering

Catering is very important to us: you can enjoy freshly prepared food in our staff canteen, a lunch menu including soup and salad, water & tea and free fruit as well as high-quality products at greatly reduced prices in our outlet.

Mobility

Benefit from convenient public transport connections, attractive ticket subsidies and ample parking facilities in the multi-storey car park.

Professional development opportunities

We cover the costs of tuition fees and study materials, and contribute CHF 700 towards a laptop of your choice. We also offer you exciting prospects for continued employment in an international environment once you have completed your studies.
