

Apprenticeship as a Production Mechanic (EFZ) 2027

Your future? It's on track with us! Do you enjoy technology, love tinkering and want to know how machines really work? Then you've come to the right place! Bell is one of Switzerland's leading food brands. At our site in Zell, Lucerne, we process poultry and manufacture a huge variety of products. Behind this are state-of-the-art production facilities, exciting technical processes and people who ensure that everything runs smoothly. And this is exactly where you come in! During your three-year apprenticeship as a production mechanic (EFZ), you'll learn how individual components are turned into functioning machines, how to solve technical problems and how to keep our equipment running smoothly. You'll be right at the heart of things, not just on the sidelines: in our workshop, right by the production lines and as part of a team that works together. Experienced specialists will guide you along the way, support you as you take your first steps into working life and give you the opportunity to take on responsibility independently. You'll also become part of our Bell apprentice community and can shape your professional future together with other apprentices.

Apply online

You can find all the details online as well as the opportunity to apply directly.

Your tasks

- You will learn how to service, repair and maintain our modern production facilities.
- You'll manufacture mechanical components and spare parts yourself – from raw materials right through to the finished workpiece.
- You'll work with various tools and machines and learn about different machining processes.
- You'll assemble sub-assemblies and plant components and learn how the technology works together.
- You'll get to the root of technical faults, identify problems and help get our systems up and running again.
- You'll work to technical drawings, measuring, testing and inspecting your workpieces.
- You'll support our technical team on exciting projects and technical improvements.
- You'll learn how important health and safety, hygiene and environmental protection are in our business.

What you bring with you

- Completed primary school, preferably middle to upper years
- A passion for technology, mechanics and modern machinery
- Enjoyment of tinkering, tinker-ing and manual work
- Technical understanding and good spatial awareness
- Good maths skills and logical thinking
- A precise, meticulous and reliable approach to work
- Curiosity, a willingness to learn and a desire to get stuck in independently
- Team spirit and a passion for finding solutions together
- An interest in modern food production

What we offer

Work-life balance

We offer 35 vacation days so that you have enough time to recover and are then fit for work and school again.

Catering

Catering is very important to us: you can enjoy freshly prepared food in our staff canteen, a lunch menu including soup and salad, water & tea and free fruit as well as high-quality products at greatly reduced prices in our outlet.

Mobility

Benefit from convenient public transport connections, attractive ticket subsidies and ample parking facilities in the multi-storey car park.

Professional development opportunities

We cover the costs of tuition fees and study materials, and contribute CHF 700 towards a laptop of your choice. We also offer you exciting prospects for continued employment in an international environment once you have completed your studies.
